Experience

Mastercard's Cybersecurity Virtual Job Simulation	Apr-13, 2025
- Analyzed potential security incidents by reviewing simulated logs and network traffic data. - Conducted vulnerability assessments and provided recommendations to strengthen system security.	
Training Placement Coordinator , LPU – Placement Cell	Apr 2025
- Acted as a bridge between students and the placement cell to facilitate smooth communication. - Addressed student queries and provided ongoing support throughout the placement process.	

Projects

Dynamic Reinforcement Learning Firewall	github-link
- Designed and implemented a dynamic RL-based firewall for real-time detection and adaptive threat mitigation - Applied Q-learning/DQN to identify anomalous traffic patterns and automatically update security rules - Deployed using Docker and evaluated performance based on accuracy, latency, and false positive rate	
Zero-Trust-Architecture-ZTA	github-link
- Designed and implemented a ZTA framework with continuous authentication and strict access verification - Applied IAM, microsegmentation, and least-privilege principles to secure network resources and user access - Integrated Azure AD, MFA, and SIEM tools for identity management, monitoring, and threat detection	
Automated Malware Analysis Sandbox	github-link
- Developed an automated sandbox environment for dynamic malware analysis and behavior tracking - Captured file system, registry, and network activity to generate detailed threat intelligence reports - Implemented using VirtualBox, Cuckoo Sandbox, Python, and ELK Stack for monitoring and analysis	

Technical Skills

- Programming Languages:** Java, Python, C/C++ , JavaScript
- Web Technologies:** HTML, CSS, JavaScript, GoLang, Rust
- Cybersecurity:** Vulnerability assessment, penetration testing, network security, threat analysis
- Tools & Frameworks:** Wireshark, Burp Suite, Metasploit, Nmap, Linux
- Cloud & DevOps:** AWS, Docker, SQL, Kubernetes, Git, GitHub

Education

Lovely Professional University , B-Tech in Computer Science	2022 – 2026
GPA: 6.24/10.0	
Mahatma Jyotiba Phule Jr. College , Science[I&II]	2019 – 2021
GPA: 8.65/10.0	

Certificate

Cloud Computing , NPTEL(Swayam)	July-Oct, 2024
CompTIA Linux+ XK0-005	May-25, 2024
Google Cybersecurity Certificate	Dec-31, 2023
